ABSTRACT

5 A method for inhibiting osteoclast formation or a method for inhibiting
bone resorption which comprises exposing cells to ultrasound in the culture
containing an osteoclast precursor and an inducing factor of osteoclast
formation and/or bone resorption. Or, a method for inhibiting osteoclast
formation or a method for inhibiting bone resorption which comprises
exposing cells to ultrasound in the co-culture containing an osteoclast
precursor and a supporting cell for osteoclastogenesis.
